Do you want to increase sales and pinpoint areas for improvement in the sales process? Do you have in-depth customer data at your fingertips?

If not, AnswerNet has the solution. Let us host your CRM for you. AnswerNet can provide you with a CRM system to help organize and analyze your customer data.

For a small monthly fee, AnswerNet will host your SugarCRM and even customize it to your own business needs. We can do this cost effectively because we use SugarCRM—an open-source CRM system. That means that the software itself is free. All you pay for is the server space to hold it and the on-call resources to maintain your system.

For only \$50/month for the first five users and only \$10 per user after that plus a small setup fee, your business will get big company CRM benefits without the big company price tag. Hosted SugarCRM with AnswerNet Includes:

- Installation
- Configuration
- Standard reports
- 2 hours of SugarCRM user training
- 2 hours of support
- Includes all tier 1 level support

So don't wait. Start managing your customer base with more efficiency than ever before. Call AnswerNet today at 800-411-5777 and ask about Hosted SugarCRM.
