Third-Party Verification

Security You Can Trust

Advanced Fraud Protection

A key feature of our platform is its capacity for robust fraud prevention. Now you can closely track and monitor your sales agents in real time to guarantee a safe & secure environment for all parties. Select from a broad list of standard alert notifications – configurable by sales channel and threshold.

SOC 2-Certified

Consistent with our commitment to ensure your data privacy and security, we are proud to be the only SOC 2-certified third-party verification provider.

Full Backup Redundancy

AnswerNet TPV is built on two systems – both on differing phone networks to keep you online without interruption. If one system goes down, you can feel safe knowing we have the redundancy to back you up as well as seamlessly verify new accounts without missing a beat.

Secure Cloud Storage

Recognized as the “gold standard for security” in the third-party verification industry, our proprietary software (TPV.com) is safely stored in the cloud and hosted by AWS to keep your information protected at all times.

The experience and resources you need to keep your data secure.

answernet.com/tpv

With so many data breaches today, it's normal to worry about the safety and security of your customers' information with third-party verification providers.

That's why you need a trusted provider who not only has done the research, but also has the experience and infrastructure in place to be the most secure third-party verification platform available today.
