

The future
of TPV is here.

Build trust and accelerate sales with a suite
of solutions that meet all your TPV needs.

V-SURE Speak

Our cutting-edge voice biometric solution is designed to enhance security, prevent fraud and streamline verification like never before.

- **Automated voice comparison:** match any new TPV recordings against existing data for seamless, instant authentication.
- **AI-powered speaker diarization:** distinguish customers from agents, ensuring precise verification.
- **Fraud prevention and anti-spoofing:** detect and flag voice masking, AI-generated speech and unauthorized alterations.
- **Multi-language support:** implement both English and Spanish for broader support.
- **Real-time confidence scoring:** measure voice match and authenticity to ensure legitimate transactions.

V-SURE Match

Prevent fraud and ghost badging with real-time face verification, ensuring only authorized sales agents and legitimate customers complete transactions.

- **Sales agent face verification:** authenticate door-to-door reps in real time to prevent fraud and unauthorized sales.
- **Customer identify protection:** capture and verify customer information on the spot, ensuring legitimacy.
- **AI-powered face matching:** compare faces to existing records instantly for secure, accurate validation.
- **Fraud prevention and compliance:** reduce impersonation risks and strengthen regulatory adherence.
- **Seamless integration:** combine with voice biometrics for multi-layered security.

Welcome to the
V-SURE Suite
of Solutions!

V-SURE View

Next level security by allowing sales reps and customers to verify their identity via a secure video link: adding another layer of fraud prevention and trust to the process.

- **Live video identify verification:** authenticate customers and sales agents in real time via secure video links.
- **Enhanced fraud prevention:** reduce impersonation and unauthorized transactions with visual confirmation.
- **AI-powered face matching:** cross-check faces against existing records for added security.
- **Regulatory compliance and risk mitigation:** strengthen adherence to industry regulations with verifiable video records.
- **Seamless integration:** combine with voice and face biometrics for a multi-layered authentication process.

V-SURE Map

Prevent spoofing and fraud: eliminate false location claims with real-time geolocation tracking.

- **Compact and convenient:** deploy small, lightweight devices known as **V-SURE Track**, which fit easily in a pocket or lanyard.
- **Live location verification:** monitor sales team movements in real time for authentic transactions.
- **Enhanced compliance and accountability:** ensure reps are operating within approved territories.
- **Seamless integration:** combine with voice, face and video for complete fraud prevention.

V-SURE Check

AnswerNet's AI-driven quality assurance automates call analysis, saving time, reducing costs and ensuring 100% compliance with industry regulations.

- **Automated compliance monitoring:** review every TPV call with AI, flagging risks and ensuring adherence to standards.
- **Significant cost and time savings:** reduce labor-intensive QA efforts with instant, AI-powered analysis.
- **Enhanced accuracy and consistency:** eliminate human error and subjective scoring with data-driven evaluations.
- **Real-time insights:** get immediate feedback on agent performance and compliance issues.
- **Scalable and efficient:** monitor every call, not just a sample, for comprehensive risk mitigation.
